2. (Amended) A substance delivery device as claimed in claim 1, wherein the substance is a drug.
  3. (Amended) A substance delivery device as claimed in either claim 1 or claim 2, wherein said device is an intra-vaginal release device.
  4. (Amended) A substance delivery device as claimed in claim 3, wherein the substance is released from the substance delivery means through osmosis.
  5. (Amended) A substance delivery device as claimed in claim 1, wherein the substance delivery means are rounded.
  6. (Amended) A substance delivery device as claimed in claim 1, wherein at least one of the substance delivery means is flexibly attached to a corresponding arm.
  7. (Amended) A substance delivery device as claimed in claim 6, wherein the at least one of the substance delivery means is attached to the corresponding arm by a ball and socket mechanism.
  8. (Amended) A substance delivery means for attachment to a substance delivery device as claimed in claim 1.

9. (Amended) A substance delivery device as claimed in claim 1, wherein the support frame is in the form of a wish bone.
10. (Amended) A substance delivery device as claimed in claim 9, wherein the arms are biased outward from a central section of the support frame.
11. (Amended) A substance delivery device as claimed in either claim 9 or claim 10 characterised in that the support frame is made of nylon.
12. (Amended) A substance delivery device as claimed in any one of claims 9 to 10 characterised in that that the arms are sufficiently pliable to be moved together to allow the substance delivery device to be effectively compressed.
13. (Amended) A substance delivery device as claimed in any one of claims 9 to 10, wherein the arms are capable of interlocking for removal or insertion.
14. (Amended) A substance delivery device as claimed in any one of claims 9 to 10 characterised in that the support frame includes a locator to enable the substance delivery device to be readily located and removed from *in situ*.
